

Simple.
Accessible.
Focused.
Surface Laptop SE

Introducing Surface Laptop SE

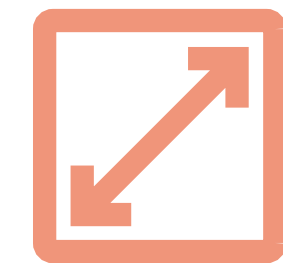

The Surface Laptop SE is a simple, affordable device designed to unlock the Windows 11 SE learning experience. It provides an easy-to-manage solution for hybrid classrooms and improved learning outcomes.

The Intel® Celeron® Processor provides all the power you need to seamlessly run Windows 11 SE and essential education apps

Online and offline capabilities mean students can work from class, home and beyond without interruption

The high-resolution 11.6" display automatically adjusts screen brightness to bring clarity to online lessons

The one to one device advantage

Blended learning is here to stay for many educators, and one to one device programmes give students, teachers and parents the tools they need to enable this way of learning.

Students

One to one device programmes empower every student to improve their learning outcomes, with technology that's tailored to meet their individual needs.

Teachers

Education apps and software enable teachers to deliver quality lessons while reducing their administrative workload.

Parents

Parents and caregivers can easily follow and find lessons or assignments on student's laptops and provide support at home.

Windows 11 SE: Reimagine teaching and learning

The Windows 11 SE operating system is purpose built for the hybrid classroom. It combines simplicity, connectivity and accessibility to help teachers maximise online learning time and help students focus on schoolwork.

Collaboration

Leveraging the collaborative power of Microsoft Teams, Laptop Surface SE keeps students connected with their teachers and peers, wherever they're working. Classmates can use chat, video and shared documents to learn together. And teachers can connect directly with students to clarify questions, review submissions and share personalised feedback – all without leaving the Teams app.

Accessibility

Windows 11 SE enables schools and universities to deliver personalised learning experiences for every student. Features such as voice typing, magnifier, colour filters and real-time closed captions make lessons more accessible.

Management

Windows 11 SE has a suite of tools to simplify device management for IT administrators and ensure devices remain secure and optimised all year long.

IT administrator-controlled app installation and strict app download rules mean that only apps for learning can be installed on devices, helping to protect against unsafe apps and keep students focused on their classwork.

Sustainability

The ENERGY STAR certified Surface Laptop SE helps schools to save money and protect the planet. Its components are easily replaced, which helps to extend the device's lifetime. And when it comes to the end of its useable life, Surface Laptop SE can be easily recycled.

Shaping the future

At XMA, we help schools and universities provide students with the technology they need to learn and develop their skills for the future.

As a Microsoft Surface Platinum Partner, with over 30 years of expertise in delivering Microsoft solutions to educators, we're uniquely qualified to help you get the most value from Surface Laptop SE.

Why XMA for Surface?

- **Dedicated education teams**
- **Managed services and support**
- **Microsoft Surface Platinum Partner**
- **Microsoft Global Training Partner**

Shape the future of learning with XMA and Surface.
