

# A day in the life of a student

Kirsty is a student in her last year of secondary school. She's excited to start her A Levels in September and plans to study chemistry at university. But first, she's got some very important projects to finish.

## 8:00 AM

Kirsty has an assignment due today and wants to give it one more check over breakfast. She uses Snap Assist to compare her research with her finished paper.

## 8:45 AM

On the bus, Kirsty's friend asks if she's coming to watch her hockey match. Kirsty downloads the fixture from the PE department's Teams page and reads it with the PDF reader in Edge.

## 10:00 AM

Kirsty's maths teacher has prepared a quiz in Teams – it launches in full screen to help her focus. Afterwards, she uses Reflect to discuss the lesson with her classmates.

## 11:30 AM

During independent study, Kirsty receives a revision prompt from her science teacher. She uses her Surface webcam to record a video response and shares it with Flipgrid.

## 2:00 PM

Kirsty heads home early but joins the weekly debate club meeting remotely. She uses Teams to share useful materials (and the occasional GIF) with the other members.

## 4:00 PM

With school out, Kirsty unwinds with a chapter of the book assigned by her literature teacher. She uses OneNote Class Notebook and voice typing to record her thoughts.

## 7:00 PM

After dinner, Kirsty logs on to Minecraft: Education Edition and starts working on a group project for her technology class. It's not due until next week, but she's keen to get ahead.

## 10:00 PM

As Kirsty gets ready for bed, she puts her Surface Laptop SE on charge. By morning, it'll be ready for another full day of learning – with no need to plug in again until night.

**Unlock learning with Microsoft Surface Laptop SE.**
